## **TERMINATION OF CORRECTIVE ACTION FORMER ORANGE PRECISION CIRCUITS Orange, California**

**45-DAY PUBLIC COMMENT PERIOD: July 7, 2011 through August 22, 2011**

**WHAT IS BEING PROPOSED?** The California Environmental Protection Agency, Department of Toxic Substances Control (DTSC), is legally required to inform the public of the intent to terminate corrective action at the Orange Precision Circuits facility, located at 812 Southern Avenue, Orange, California.

Orange Precision Circuits operated from 1983 until 1989. The facility engaged in the production and etching of printed circuit boards. In this process Orange used various acid baths and reclaimed copper and other metals. During building closure all tanks and etching equipment was removed from the facility. Soil was excavated to a depth of six feet under the main production area. At the time of soil excavation, sampling for metals such as copper and lead indicated closure cleanup standards had been achieved. Closure was completed in 1993.

In 2002 a Resource Conservation and Recovery Act (RCRA) Facility Assessment (RFA) was completed to initiate corrective action. DTSC's major concern is volatile organic compounds (VOCs), for which sampling was omitted during closure. A soil gas investigation was conducted in 2010 to fill this outstanding data gap. The results reported that no VOCs were detected that would impact human health or groundwater. DTSC is now public noticing the intent to terminate corrective action for this site.

**HOW TO SUBMIT COMMENTS:** You can submit written comments during the 45-day public comment period beginning Thursday, July 7, 2011, and closing on Monday August 22, 2011. Please direct all written comments by mail, e-mail or fax by no later than August 22, 2011 to:
